

**NORTHWEST REGION HEALTHCARE COALITION**

## **WEEKLY DIGEST**

Friday, June 26, 2020

\*This will be disseminated every Friday until further notice\*

Special THANK YOU to all healthcare facilities, public health partners and other external partners for your participation, sharing of resources and communication over these last few weeks and for the weeks and months to come. We are appreciative and thankful for your relationship with the coalition.

## Updated CDC/OSHA/FEMA/NIOSH/Other External Guidance

In this section, we will share links to various external informational sources that may be of use to your organization. Please note that this is NOT an all-inclusive list but we will continue to add as we are provided information.

### Governor's FAQs re: Phase Reopening

<https://www.virginia.gov/coronavirus/forwardvirginia/faq/>

Please see an important notice below from our colleagues at DCLS (Division of Consolidated Laboratory Services) regarding their process for communicating negative COVID-19 test results. For all those waiting on test results for PUI inpatients submitted to DCLS prior to today there is a number highlighted below to call to receive the results, rather than receiving the results via mail which was the prior standard process for negatives. It is also important for the submitter information to be included on the submission form and clinicians are encouraged to consider verbal results as actionable

- DCLS will be calling all COVID-19 test results (positives and negatives) to the submitter identified on the submission form.
- If acceptable, it would be great if there could be a communication from VHHA to encourage clinicians to consider the verbal result as actionable.
- If a submitter is NOT identified on the form we will attempt to get the submitter/clinician information from the local health department and will call the results as soon as possible.
- Within 24 hours of calling the result to the submitter, DCLS will fax a hard copy of the test result to the submitter as long as all of the information on the submission form is complete and accurate. Without complete and accurate information we are unable to finalize the test result in our laboratory information management system to generate a paper report. This is why it will be extremely important for hospitals and providers to ensure the completeness and accuracy of the information on the submission forms.
- We are working through a backlog of samples that the results have been called but we have not yet been able to release the report due to submission form discrepancies. We have mobilized additional staff to assist in reconciling and releasing these reports.

**If there are any hospitals or clinicians that are in need of test results for samples submitted, please have them contact our main switchboard at 804-648-4480 to request test results and someone will take their information and call them back with the results.**
